

**CLEANING YOUR BRUSH:**

To clean your brush, you must remove the 'brush plate' from the 'brush head.'

**IMPORTANT: DO NOT GET THE HANDLE or BRUSH HEAD WET.**

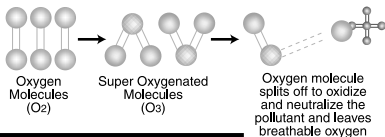

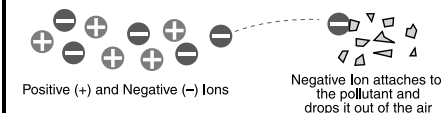

To remove the brush plate, hold the handle firmly in one hand. With the other hand, using your thumb (illustration D), press firmly in a downward direction on the top of the brush plate until it snaps out of place. Then simply lift the brush plate off and remove any hair that has collected. Rinse it off in the sink with warm, soapy water.

**THE TECHNOLOGY BEHIND THE IO-50**

Have you noticed how fresh the air smells after a thunder and lightning storm or near a waterfall?

Lentek's Air Energizing Technology utilizes the same process that Mother Nature does by emitting safe levels of negative ions and O<sub>3</sub>.

**ZYONIC™ SUPER OXIDATING SANITIZER TECHNOLOGY (SOS)**

**ZYONIC™ AIR ENERGIZING TECHNOLOGY**

# LENTEK WARRANTY

Purchase Date \_\_\_\_\_

This Limited Warranty is effective upon purchase. Please complete the attached Registration and return to Lentek International.

1. Lentek International warrants this product to be free of manufacturing defects. Should any such defect develop or become evident within ONE year from the date of purchase, Lentek International will replace the entire product or, at its option, repair or replace the defective part(s) without charge.
2. Securely pack the entire unit. Be sure carton clearly identifies sender by name and address. Attach a letter or card describing the defect. Original receipt of purchase must be included in returned package for warranty coverage.
3. This warranty is void if damage or malfunction is due to abuse or failure to operate product in accordance with instructions and on recommended electrical current.

## DIRECTIONS FOR USE:

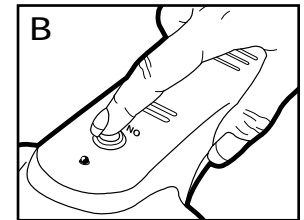

### LOADING THE BATTERIES:

This unit requires one (1) 9 volt battery (not included). The battery compartment is on the back of the handle. Remove battery compartment cover, screw. Push in and slide the lid downward (illustration A). Snap in the battery. Slide the lid back into position until it snaps securely in place.

### POWER ON:

To activate the cleansing Zyonic™ and flea repelling technologies, simply press the power button on the brush handle (illustration B). The LED should flash with a 'green' light. This indicates that the power is on. If the LED flashes with a 'red' light, it means that the battery is low and needs to be replaced for optimum performance.

### LED INDICATORS:

Flashing GREEN LED - indicates 'ON' duration.  
Flashing RED LED - indicates battery is low.

### BRUSHING YOUR PET:

For full effectiveness, gently brush your pet with slow steady brush strokes (illustration C). Regular brushing for 5 minutes a day will help to keep the fleas from returning.
