

MEDLINE

Alternating Pressure and Low Air Loss Systems
Designed Specifically for Extended Care & Home Care

Standard Features You'd Expect from Medline's Specialty Support Surfaces...

Medline offers a complete line of Specialty Support Surfaces to help prevent and treat Stage 1 through Stage 4 Pressure Ulcers, or other complications of being bedridden. Each system is designed with ease of operation in mind.

Here are the **Standard Features**...that appear in ALL of Medline's low air loss and alternating pressure therapy mattresses:

- Near silent operation
- Easy adjustment for resident comfort
- Pump alarms to indicate low pressure
- CPR-pull for emergency deflation
- Replaceable air cells and top cover
- Static mode for dressing changes and pain management

Medline Supra CXC

Advanced Low Air Loss & Alternating Pressure Therapy

This Mattress Replacement System fits directly on any healthcare bed frame. The Supra is an easy to use system suitable for any long-term or homecare wound treatment protocol for prevention through stage 4 pressure ulcers.

All Standard Features, plus...

- Low Air Loss and Alternating Pressure combined for aggressive pressure ulcer treatment
- Air pump is low maintenance, and extremely reliable
- Bottom air cells stay inflated during power outages
- Comes with carry bag for easy transport or storage
- Supports patients up to 300 lbs.
- Meets Medicare HCPCS code E0277

Supra CXC from Medline
MDT24SUPRACXC

CPR pull for quick deflation

Air pressure easily adjusts from soft to firm based on patient weight

Medline MedTech Air
MDT24MEDAIR

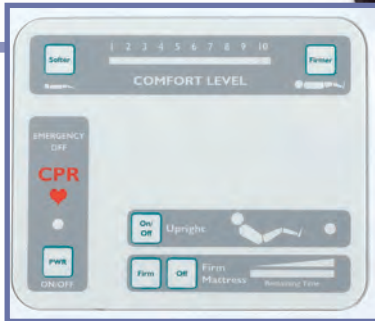

Medline MedTech Air

This blower based “True” low air loss system is our most advanced low air loss system. It provides exceptional protection against pressure, shearing, friction and moisture. Recommended for patients with any stage pressure ulcer, myocutaneous skin flaps and skin grafts.

All Standard Features, plus...

- “True” low air loss system circulates air through 16 individual cells. The air is distributed equally across the top mattress surface wicking moisture away from the patient
- User friendly digital power unit provides rapid inflation and easy set up
- Integrated side bolsters keep patients centered in the bed reducing the risk of entrapment
- Features “firm” mode for dressing changes and repositioning, and “upright” mode for added support when the head of the bed is elevated
- Foot pillow prevents unnecessary skin breakdown due to patient migration
- 400lb. capacity
- Meets HCPCS code E0277

Easy to adjust digital power unit is so quiet the patient will hardly know it is there!

MedTech 8000

Alternating Pressure Therapy

This is our most economical Mattress Replacement System. Made with 8-inch air cells, the MedTech 8000 offers 30% more air cushion than similarly priced competitive models.

All Standard Features, plus...

- Small and lightweight for easy transport
- Supports patients up to 300 lbs.
- Meets Medicare HCPCS code E0277

MedTech 8000
MDT248000

The MedTech 8000 control unit features a "static mode" for dressing changes and pain management. Dial settings are in measurable, and recordable patient weight increments.

Bariatric APM
MSCBARIAPM42
MSCBARIAPM48

Medline Bariatric Alternating Pressure Mattress

This bariatric mattress system provides both comfort and therapy. Packed with features including adjustable cycle times and digital display, this system is a cost effective skin protection and treatment product for large patients.

All Standard Features, plus...

- 750lb. weight capacity
- Recommended for prevention through stage 4 pressure ulcers
- Available in 42 inch (MSCBARIAPM42) and 48 inch (MSCBARIAPM48)
- Bottom cells stay inflated during power outages to protect patient
- Autofirm feature helps facilitate nursing care
- One hand lock/quick release tubing connectors
- Adjustable pressure settings for a custom fit
- Meets Medicare HCPCS code E0277 (42in.)

MedTech 5000

Low Air Loss
& Alternating Pressure Overlay

The MedTech 5000 is a high quality Mattress Overlay. Our 5-inch air cells offer 20% more air cushion and better flotation than the 4-inch air cells of competitive models.

All Standard Features, plus*...

- Small and light weight for easy transport
- Supports patients up to 300 lbs.
- Meets Medicare HCPCS code E0372
- * see inside front cover for **Standard Features**
