Biotene Mouthwash, Moisturizer and Toothpaste

Biotene is comprised of an organic system found naturally as human saliva. It recreates the natural oral protection found in the mouth to provide a healthy oral environment. Biotene products are especially helpful for the bedridden or handicapped patient who may have difficulties maintaining good oral hygiene.

**Biotene Exclusively from Medline**

Key Features (mouthwash, moisturizer and toothpaste):
- Replicates enzymes, encompassing the patient’s natural defenses, which fight harmful bacteria growth and infection
- Contains no hydrogen peroxide, which can damage compromised tissue in the oral cavity
- Helps promote healthy gum tissue
- Neutralizes odor and unpleasant tastes
- Helps reduce the risk of mouth sores and ulcers
- Ideal for patients with sensitive gums

**oralbalance** Moisturizing Gel
- Neutralizes dry oral tissue from maceration, flushing and burning sensations
- Provides immediate relief and several hours of comfort
- Non-drying, long-lasting, fragrance-free formula
- Improves retention under dentures

Mouthwash with Calcium
- Contains a naturally occurring mineral which is safe for dentures
- Reduces the effect of dry mouth
- Right laxative (Ibuprofen)
- Cleans and refreshes quickly without burning or stinging
- Enhances the antibacterial flora of the oral cavity
- Alcohol-free, gentle formula
- Reduces the risk of infection, mouth sores and plaque formation

Toothpaste
- Toothpaste contains no Sodium Lauryl Sulfate (SLS) and is extra gentle for dry tissues
- Helps promote healthy gum tissue

Common Causes of Oral Dysfunction
- Cancer Therapies
- Medications
- Bone Marrow Transplant
- Diabetes
- Infection
- Oral Deficiency (Diabetes)
- Surgery
- Over 100 Medications

Medical Conditions/Diseases
- Aging
- Surgery
- Over 400 Medications

Did you know?
- Biotene does not use hydrogen peroxide based products.
- Hydrogen peroxide kills most of the bacteria in the mouth, including beneficial bacteria. Healthy bacteria decreases the risk of infections, mouth sores and plaque formation.

**Oral Care Accessories**

Medline is a leading provider of respiratory suction products. We offer a complete line of products to solve your problem, and one unsurpassed customer service. We manufacture, supply and directly support our full line of products that includes open and closed suction catheters, yankauer, and poole tip suction handles, suction canisters, and tubing accessories. We also offer a full line of medical waste solidifiers and disinfectants to help you comply with OSHA and Federal DOT regulations, while keeping your costs low.
3 important reasons for a strict oral hygiene protocol.

1. Reduce chance of VAP

VAP is a serious complication of hospitalization and a common cause of hospital-acquired infections.

2. Help alleviate dry mouth

Dry mouth is a common problem in patients who require mechanical ventilation. It can lead to increased frequency of nosocomial infections and can be a serious health risk to patients. It may increase ICU length of stay by 6+ days and overall hospitalization and a serious health risk to patients. It may increase ICU length of stay by 6+ days and overall hospitalization.

3. Overall patient/resident well-being

Whether in the hospital or nursing home, good oral care is important for the health and comfort of the patient. It helps prevent infection by controlling bacteria and fungi in the mouth. It helps prevent the formation of plaque, which can lead to periodontal disease. Addressing the needs of proper oral hygiene can alleviate this condition and prevent prolonged hospitalization.

DenTips Disposable Oral Swabs

DenTips disposable oral swabs are made of long plastic handles to help prevent touch contamination. The swabs are made of long plastic handles to help prevent touch contamination. To get in between the teeth to remove debris. Product is available in a variety of packaging options, including perforated, reusable bags and convenient dispenser pads, to meet clinical needs.

Medicare Industries, Inc.
Bionte is comprised of an optimized system found naturally as human saliva. It returns the natural oral protection found in the mouth to provide a healthy oral environment. Bionte products are especially helpful for the bedridden or handicapped patient who may have difficulties maintaining good oral hygiene.

Bionte: Exclusively from Medline

Key Features (mouthwash, moisturizer and toothpaste)
• Replicates enzymes, mimicking the patient’s natural saliva, which fight harmful bacteria growth and infection
• Contains no hydrogen peroxide, which can damage compromised tissue in the oral cavity
• Helps promote healthy oral flora
• Neutralizes odors and unpleasant tastes
• Helps reduce the risk of mouth sores and ulcers

oralbalance
• Soothes and moisturizes dry oral tissues from minor irritation, itching and burning sensations
• Provides immediate relief and several hours of comfort
• Non-drying, long-lasting, sugar-free formula
• Improves oral or phantom dentures

Everyone knows good oral care is important for the health of a patient or resident. However, studies find that good oral hygiene can minimize nosocomial infections. There are 3 important reasons for a strict oral hygiene protocol.

1. Reduce chance of VAP

VAP (Ventilator-Associated Pneumonia) is the primary management discrepancy to infective control practitioners and a serious health risk to patients. It may increase 30-day length of stay by 5 to 10 days and cost hospitalization by greater than 30 days, resulting in an average cost per VAP patient of $29,369. Good oral hygiene can help prevent VAP.

2. Help alleviate dry mouth

Dry mouth or xerostomia is a condition where the body does not produce enough saliva, so there is less natural protection of oral and airway. This condition affects 1 out of every 5 people and can lead to health complications of increased infection. One of the benefits of saliva (and its moisture) is the protection it affords teeth and gum. It prevents tooth decay and helps prevent infection by controlling bacteria and fungi in the mouth. Addressing this need with proper oral hygiene can help alleviate this condition and prevent associated infections.

3. Overall patient/resident well-being

Whether in the hospital or nursing home, good oral hygiene is essential to focus infections and an overall sense of patient satisfaction.

DenTips Disposable Oral Swabs

Mothckers disposable oral swabs feature a color coding system for Tray stained (green) or Untreated (blue) swabs. The swabs are made of long plastic handles to help prevent tooth brushing contamination. The tray has ridges to get in between the teeth to remove debris. Product is available in a variety of packaging options, including perforated, reusable bags and convenient dispenser pads, to meet clinical needs.

Disposable Oral Swabs

Disposable Oral Swabs are made of long plastic handles to help prevent tooth contamination. The shaft has tips to get in between the teeth to remove debris. Product is available in a variety of packaging options, including perforated, reusable sachets and convenient dispenser pads, to meet clinical needs.

Biotene Mouthwash:

Mouthwash is ideal for cancer patients and those with sensitive gums/tissues. The foam has ridges to prevent touch-contamination. The foam has a chimney-style valve, it provides better protection for the caregiver. The forward placing of the valve faces out and not up as in a traditional chimney-valve Medline’s Contro-Vac valve. Because this valve faces out and not up as in a traditional chimney-valve Medline’s Contro-Vac valve.

DenTips Disposable Oral Swabs

DenTips are used to remove mucus build-up from the patient’s mouth. Apply resin along the tongue, cheek, teeth and gums. Swabs may be used alone or in combination with toothpaste, mouthwash or moisturizer.
